

<p>This half term: Skills, Knowledge and Understanding to be developed:</p> <ul style="list-style-type: none"> • Skills (students <u>WILL BE ABLE</u> to by the end of the Learning Programme): represent simple molecules using chemical formulae and a diagram and key; write the formulae of ionic compounds given the formulae of the ions they contain; represent chemical reactions using balanced chemical equations • Knowledge (students <u>WILL KNOW</u> by the end of the Learning Programme): the meaning of the terms relative atomic mass and relative molecular (formula) mass; that chemical reactions are a process of re-arrangement of the atoms present in the reactants to form one or more products • Understanding (students <u>WILL DEMONSTRATE</u> their understanding): by answering past paper questions on each learning outcome. 		<p>Key Terms / Words Element, compound, electron, proton, neutron, atomic number, relative atomic mass, formula, equation, periodic table.</p>	
<p>LP 1 – Week 1 Learning Outcomes:</p> <p>1. Elements Students will be able to:</p> <ul style="list-style-type: none"> ○ know that elements are substances made up of only one type of atom. ○ represent elements using chemical symbols ○ label an atom model <p>2. Compounds (2 lessons) Students will be able to:</p> <ul style="list-style-type: none"> ○ understand that compounds are substances made of two or more different types of atom that are chemically joined ○ carry out an investigation which demonstrates the formation of a compound ○ name compounds from their constituent elements and vice versa 		<p>Success criteria:</p> <ul style="list-style-type: none"> • Students will use the periodic table to identify element symbols and names • Students will be able to label an atom • Students will be able to name compounds from their constituent elements and vice versa. • Students will investigate how the properties of elements change on the formation of a compound 	<p>Homework 1 LP 1 Google classroom: Quiz on elements</p>
<p>LP 1 – Week 2 Learning Outcomes:</p> <p>3. Mixtures Students will be able to:</p> <ul style="list-style-type: none"> ○ understand that a mixture is two or more elements or compounds that are in the same place but not chemically joined together ○ Identify elements, compounds and mixtures using particle diagrams <p>4. APP Students will be able to:</p> <ul style="list-style-type: none"> ○ Demonstrate their understanding of elements, compounds and mixtures in APP assessment <p>Students will apply and demonstrate new knowledge and skills in APP assessment on elements, compounds and mixtures.</p> <p>5. Formula Students will be able to:</p> <ul style="list-style-type: none"> ○ understand compound formula ○ identify which elements are present in a compound from a given formula, along with the number of atoms of each element present. <p>(Literacy framework strand- 9.OS4- I can respond to how listeners are reacting by adapting what I say and how I say it.)</p>	<p>Assessment →</p> <p>APP</p> <p>Mark</p>	<p>Success criteria:</p> <ul style="list-style-type: none"> • Students will be able to identify elements, mixtures and compounds (EMC) using particle diagrams • Students will apply their knowledge of EMC to answer past paper questions on the topic • Students will be able to identify which elements are present in a compound from a given formula, along with the number of atoms of each element present. 	<p>Homework 2 LP 1 Revise for APP by completing the yellow revision sheet on elements, compounds and mixtures</p>

<p>LP 1 – Week 3 Learning Outcomes:</p> <p>6. Generating formula of ionic compounds (2 lessons) Students will be able to:</p> <ul style="list-style-type: none"> ○ write the formulae of ionic compounds given the formulae of the ions they contain. <p>7. Space filler diagrams Students will be able to:</p> <ul style="list-style-type: none"> ○ represent simple molecules using chemical formulae and a diagram and key. 		<p>Success criteria:</p> <ul style="list-style-type: none"> • Students will be able to write the formulae of ionic compounds. • Students will be able to draw space-filler diagrams from a given key. 	<p>Homework 3 LP 1 Google classroom: Quiz on formulas</p>
<p>LP1 – Week 4 Learning Outcomes:</p> <p>8. Balancing equations (2 lessons) Students will be able to:</p> <ul style="list-style-type: none"> ○ balance symbol equations. ○ know that chemical reactions are a process of re-arrangement of the atoms present in the reactants to form one or more products, which have the same total number of each type of atom as the reactants <p>9. Filtration and evaporation Students will be able to:</p> <ul style="list-style-type: none"> ○ know that atoms/molecules in mixtures are not chemically joined and can be easily separated by physical processes such as filtration and evaporation ○ recall the key words associated with the process of filtration and evaporation 		<p>Success criteria:</p> <ul style="list-style-type: none"> • Balance a range of symbol equations from simple to examples more difficult equations that include brackets • To be able to identify how to separate mixtures based on solubility 	<p>Homework 4 LP 1 Revise for SA – end of term test on all aspects of the work covered during LP1</p>
<p>LP1 – Week 5 Learning Outcomes:</p> <p>10. Distillation Students will be able to:</p> <ul style="list-style-type: none"> ○ know that atoms/molecules in mixtures are not chemically joined and can be easily separated by physical processes such as distillation <p>11. SA Students will apply and demonstrate new knowledge and skills in an end of unit summative assessment. (SUMMATIVE based on ~30 marks. Questions will consist of a variety of short 1,2,3,4 and 6 mark questions.)</p>	<p style="text-align: center;">  <div style="border: 1px solid blue; padding: 2px; width: fit-content; margin: 5px auto;">SA</div> <div style="border: 2px solid red; padding: 5px; width: fit-content; margin: 5px auto;">Mark</div> <div style="border: 2px solid red; padding: 5px; width: fit-content; margin: 5px auto;">Grade</div> </p>	<p>Success criteria:</p> <ul style="list-style-type: none"> • Complete QWC on distillation of ethanol and water. • To be able to identify how to separate mixtures based on solubility and boiling point. • SUMMATIVE ASSESSMENT 	
<p>LP1 – Week 6 Learning Outcomes:</p> <p>12. Review work on S.A Students will reply to feedback on their summative assessment.</p> <p>13. Chromatography (2 lessons) Students will be able to:</p> <ul style="list-style-type: none"> ○ understand the principle behind chromatography as a separation technique ○ know how to undertake chromatography. ○ interpret chromatographic data analysis ○ will recognise and apply key mental facts and strategies (Numeracy Focus: 8N4) and use a range of strategies to check calculations including the use of inverse operations (Numeracy Focus: 7N16) when calculating R_f values and the distance travelled by pigments from chromatograms. 		<p>Success criteria:</p> <ul style="list-style-type: none"> • Complete and analyse their own chromatograph 	

<p>LP1 – Week 7 Learning Outcomes:</p> <p>14. Skills – Planning Students will be able to:</p> <ul style="list-style-type: none"> ○ use scientific skills to plan an investigation to test the following question; ‘Do two pigments contain the same ink?’ ○ use technical terms, language and expression (Literacy focus: WL2); use paragraphs to organise their response (Literacy focus: WS4) and write a broad account to answer the question (Literacy focus: WM1). <p>15. Skills – Success Criteria Students will be able to:</p> <ul style="list-style-type: none"> ○ determine the success criteria for carrying out chromatography ○ justify reasons for the success criteria chosen <p>16. Skills – Review Success Students will be able to:</p> <ul style="list-style-type: none"> ○ decide whether their method was successful by referring to their success criteria ○ evaluate how far success criteria fully reflects successful outcomes ○ say how they could improve their method <p>PLEASE NOTE, THIS LEARNING PROGRAMME IS SUBJECT TO CHANGE.</p>		<p>Success criteria:</p> <ul style="list-style-type: none"> ● Plan a safe step-by-step method in order to answer the question given ● Review findings by identifying and explaining pattern ● Evaluate learning during the investigation
